## **Post-metal act Mayon to release a full-length debut on vinyl**

**It began as a project, out of which grew a full-fledged band that is gaining ground on the Czech post-metal scene. And now, things are about to get even more intense, for very soon, Mayon will release their full-length debut under the Prague-based label MetalGate!**

The album is entitled *V těle a zemi* (In Body and Earth) and was recorded in 2023 in the Golden Hive Studio. The band thus decided to work again with the sound engineer Amák. *"He has covered a lot of music, and we operate on a similar frequency so to speak, so we knew exactly what to do and how to make it sound the way we wanted,"* says the guitarist Crack, adding that the band had a clear plan before going to the studio. Part of said plan was also that the album will be released by a label.

The one picked up was MetalGate, which seemed like a logical choice, since they have a lot of experience releasing music like this. *"I sent the album to Ondra from MetalGate, who then went to one of our shows to check us out, and after that we talked specifics. True, it took some time before it was out turn (the album is coming out two years after being recorded), but MetalGate are pros and our dealings are easy-peasy,"* notes Crack.

The offering of five tracks is coming out in May on vinyl in two color versions: classic black and a color with galaxy effect.
