

METALGATE

The unique music project POSTCARDS FROM ARKHAM to release its second album under MetalGate Records

POSTCARDS FROM ARKHAM is the proverbial rabbit hole into a world of fantasy, presided over by the master of horror H. P. Lovecraft, thanks to a union of multiple music genres, such as post-rock, metal, electro, film or ambient music. Supplemented by a strong literary influence, this synthesis makes PFA a singular artistic project in the Czech Republic.

The founder, author and mastermind of the project Marek “Frodys” Pytlík signed an album deal on January 20, 2015, a deal with the representatives of MetalGate Records, pertaining to the upcoming PFA title “ÆØN5”, and subsequently ventured into the MetalGate Studio in Vsetín to begin recording. The new album release date is set for September 2015.

The ÆØN5 album shall be the successor to the acclaimed album OCEANIZE, which revolved around the Cthulhu mythos. The new piece on the other hand shall offer original tales, inspired not only by Lovecraft, but also by E. A. Poe or H. Murakami, complemented with original artwork or fantasy music video.

“We are trying to create a work of art that will allow you to venture far away from this world into vistas beyond the horizon of your imagination, where you may find what you never wanted to know,” says Frodys about the current project.

So, if you like to tread across wondrous dreamscapes, join Postcards From Arkham on this eldritch journey, but beware, it is not for everyone...
