

# METALGATE

## **MetalGate Records 2014 – dawn of The New Generation**

If you have been following the metal bands contest MetalGate Massacre, you surely remember **REVENGE DIVISION**. In its third installment, this death-thrash metal band from Slovakia captivated the audience so much that it made it all the way to the finals, gaining the overall bronze position. Two years later, this year that is, **the paths of MetalGate and Revenge Division meet again**, this time to make a **new mark in the band's discography**. Yes indeed, **RD are preparing their debut album and MetalGate Records will be on board!**

The album entitled **“The New Generation”** shall be released in **September 2014**. It will contain **11 blasting tracks**, which, although not connected by any conceptual storyline, still **have a common denominator – the ideal of man's freedom**; a current topic indeed, which the album shall explore from **various angles**.

It shall explore **motifs of propaganda and media manipulation, ideological dogmatism**, both secular and theological, **or power plays** that often utilize armed conflicts, the true causes of which remain utterly obscured to ordinary people. It is not a coincidence that one song on the album is directly inspired by the classic piece of dystopic literature, Orwell's novel **“1984”**. The vibe however shall not be just pure pessimism, since an integral part of the album is a **contrasting theme of hope** that a way out can be found even from a mess like this.

**The music production** is overseen by **Tonda Smrčka** from the Prague based studio **Seabeast Production**, where the album was recorded, and which in the past cooperated with bands like Diphteria or Into Dust. **The visual side** is being handled by the renowned **Isis Design Studio**, the services of which are used by e.g. Brutal Assault festival, the Austrian grinders Mastic Scum, or by the local Noostrak, Poppy Seed Grinder or Desire for Sorrow.

Fear not, we shall **present you the art** of **“The New Generation”** in due time, and thanks to **the studio reports**, you will get a glimpse of how the recording itself went.

**So, do not forget to stay tuned to MetalGate and Revenge Division websites for more info.**
