

METALGATE

MetalGate proudly presents: Secret of Darkness – (IN)HUMANITY

North is always the rougher quarter, especially the North of Bohemia these days. Despite that, the North Bohemian Varnsdorf gave birth to a noteworthy metal band, playing splendidly melodic black/death which soothes the ear, only to be transformed into an infernal sound blast. After six years of existence, the band matured and thus the new album is to be looked forward to. The October 22 release show in Peklo club in Varnsdorf also witnessed the debut of a new collection of T-shirts and other merchandise, created for the occasion of CD release.

The band Secret of Darkness originated in 2005, when the core of band's lineup was formed. The rest of the year was marked by preparations of initial music material, as well as by recruitment of additional members into the band. In February 2006 the band played its first live concert, in instrumental fashion only, as SoD failed to recruit a suitable vocalist. This problem was solved in November 2006 and the band could thus start functioning fully. During its concert activities, SoD played on the club as well as on the festival scene, and also performed abroad. In 2008, the band released its debut EP ...and the Dark Begins. Compositions for the next piece began to crystallize in 2010 and when playing on the club minifestival MetalGate Spring Prelude 2010, the band was presented with an album deal offer from MetalGate Records.

(IN)HUMANITY album was recorded and mastered this August in the Šopa studio. The album artwork was skillfully undertaken by guitarist David. The CD in digipack format is available from October 24, 2011, at MetalGate e-shop, as well as on the live shows of the band.
